

Born to Survive

Born to Survive is Allan's memoir of his days in the RAF, put together with the help of Alex Madeley as ghostwriter.

Determined to fly and proving himself an instinctive fighter pilot by becoming a fighter ace, Allan Scott survived unscathed three tours of operational flying against the enemy. One such tour took him into the frenzied skies over Malta GC during the desperate battle to save that island. Furthermore, in his role as a test pilot flying over eighty different aircraft types, Squadron Leader Scott cheated death several times in crashes and near squeaks.

This is the remarkable story of his enduring skill and courage as well as the good fortune that has followed him.
